

Adding Bills and Coins to Solve Problems

Grade 2

Name: _____

Count bills and coins to solve problems.

Count bills first, then coins, then add all amounts together. Remember to use proper dollar notation for final answers.

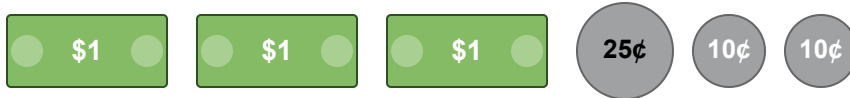

- (1) Mia has 2 one-dollar bills, 2 quarters, and 4 pennies. How much money does she have?

- (2) David has 1 five-dollar bill, 3 dimes, and 2 nickels. How much money does he have?

(3) Emily found 3 one-dollar bills, 1 quarter, and 2 dimes. What is the total amount?

(4) Jacob has 1 five-dollar bill, 2 one-dollar bills, and 7 pennies. How much money does he possess?

(5) Olivia received 4 one-dollar bills, 3 nickels, and 6 pennies. What is her total money?
