

Dividing into Equal Groups: Finding Number of Groups – Grade 2 (Medium) – Set 1

Grade 2

Name: _____

Divide objects into groups. Count the groups.

Example: Count the objects. Given the size of each group, find how many groups are needed.

- (1) There are 18 flowers. You put 3 flowers in each vase. How many vases do you need?

- (2) You have 28 candies. You give 4 candies to each friend. How many friends can get candies?

- (3) A store has 30 toys. They put 5 toys on each shelf. How many shelves do they need?

(4) There are 21 birds. If 3 birds sit on each branch, how many branches are needed?

(5) Sarah has 32 stickers. She puts 8 stickers on each page. How many pages does she use?

(6) There are 45 fish. If you put 9 fish in each tank, how many tanks do you need?

(7) A box has 24 crayons. If you give 3 crayons to each student, how many students get crayons?

(8) Mom bought 40 apples. She wants to put 10 apples in each bag. How many bags does she need?
