

Basic properties of 2-D shapes: Shape Riddles

Grade 2

Name: _____

Read the riddle and choose the correct shape.

Shapes may be rotated or colored differently.

(1) I have 5 straight sides and 5 corners. What am I?

(A) Hexagon (B) Pentagon (C) Octagon

(2) I have 4 straight sides and 4 corners. Two of my sides are parallel, but my other two sides are not. What am I?

(A) Square (B) Trapezoid (C) Triangle

(3) I have 4 sides that are all the same length, and 4 corners. My angles are not always 90 degrees. What am I?

(A) Square (B) Rectangle (C) Rhombus

(4) I have 8 straight sides and 8 corners. What am I?

(A) Hexagon (B) Octagon (C) Pentagon

(5) I have 4 straight sides and 4 corners. My opposite sides are parallel and equal in length. I am not always a rectangle. What am I?

(A) Square (B) Parallelogram (C) Trapezoid

(6) I have one straight side and one curved side. I am half of a circle.

What am I?

(A) Circle (B) Oval (C) Semicircle

(7) I have 7 straight sides and 7 corners. What am I?

(A) Hexagon (B) Octagon (C) Heptagon

(8) I have 3 sides and 3 corners. One of my corners is a perfect square corner (90 degrees). What am I?

(A) Equilateral Triangle (B) Right Triangle (C) Isosceles Triangle
