

Weights in ounces

Grade 2

Name: _____

Solve problems involving weight in Ounces (oz). Add, subtract, or estimate.

Ounces are used for light objects. 16 ounces make 1 pound. **Example:** 5 oz + 3 oz = 8 oz

- (1) A small book  weighs 7 oz. A pencil box  weighs 5 oz. What is their total weight? _____ oz
- (2) A bag of grapes  weighs 18 oz. You eat 6 oz of grapes. How many ounces are left? _____ oz
- (3) A single coin  weighs about: (A) 1 oz (B) 15 oz
- (4) Each small apple  weighs 4 oz. You have 3 small apples. What is the total weight? _____ oz

(5) A toy car 🚗 weighs 9 oz. A toy truck 🚚 weighs more. Together they weigh 16 oz. How many ounces does the truck weigh?

_____ OZ

(6) A bottle of juice 🍹 weighs 15 oz. A can of soda 🥤 weighs 10 oz. What is the difference in weight? _____ OZ
