

## Customary Units of Length: Customary Length Conversions

Grade 3

Name: \_\_\_\_\_

Convert between customary units of length.

12 in (inch) = 1 ft (foot) | 3 ft = 1 yd (yard) | 1,760 yd = 1 mi (mile)

**Example:** 3 yd = 9 ft

(1) 5 ft = \_\_\_\_\_ in 

(2) 36 in = \_\_\_\_\_ ft 

(3) 4 yd = \_\_\_\_\_ ft 

(4) 21 ft = \_\_\_\_\_ yd 

(5) 2 mi = \_\_\_\_\_ yd 

(6) 3520 yd = \_\_\_\_\_ mi 

(7) 1 mi = \_\_\_\_\_ ft 

(8) 5280 ft = \_\_\_\_\_ mi 

(9) 48 in = \_\_\_\_\_ ft 

(10) 7 ft = \_\_\_\_\_ in 

(11) 6 yd = \_\_\_\_\_ ft 

(12) 30 ft = \_\_\_\_\_ yd
