

Dividing into Equal Groups: Finding Number of Groups – Grade 3 (Medium) – Set 1

Grade 3

Name: _____

Divide objects into groups. Count the groups.

Example: Count the objects. Given the size of each group, find how many groups are needed.

- (1) There are 28 flowers. You put 4 flowers in each vase. How many vases do you need?

- (2) There are 30 small toys. You put 5 toys into each box. How many boxes do you need?

- (3) A store has 32 candies. They put 8 candies into each jar. How many jars are needed?

- (4) There are 45 shirts to fold. If you put 9 shirts in each pile, how many piles will there be?

(5) You picked 27 berries. If you put 3 berries in each bowl, how many bowls will you fill?

(6) A pet shop has 21 fish. They place 7 fish in each tank. How many tanks are needed?

(7) There are 48 stamps. You put 6 stamps on each page of an album. How many pages do you need?

(8) A farmer harvested 24 oranges. He puts 8 oranges into each net bag. How many net bags does he need?
