

## Division: Introduction to Long Division (1-digit quotients)

Grade 3

Name: \_\_\_\_\_

Solve each long division problem. Show work.

Example: 
$$\begin{array}{r} 4 \\ 2 \overline{) 8} \\ \underline{- 8} \\ 0 \end{array}$$

(1) 
$$5 \overline{) 158}$$

(2) 
$$7 \overline{) 780}$$

(3) 
$$9 \overline{) 194}$$

(4) 
$$3 \overline{) 548}$$

(5) 
$$5 \overline{) 734}$$

(6) 
$$7 \overline{) 424}$$

(7) 
$$9 \overline{) 870}$$

(8) 
$$3 \overline{) 348}$$
