

## Drawing Quadrilaterals by Properties

Grade 3

Name: \_\_\_\_\_

Draw each quadrilateral based on its properties.

Draw each shape carefully, making sure it has the correct number of sides and the right properties (right angles, parallel sides, equal sides).

**Example:** **Word Bank:** rectangle, rhombus, trapezoid, parallelogram, square

**Answer: square**

(1) Draw a square with four right angles and four equal sides.

\_\_\_\_\_

(2) Draw a rectangle with four right angles and two pairs of parallel sides.

\_\_\_\_\_

(3) Draw a rhombus with four equal sides and two pairs of parallel sides.

\_\_\_\_\_

(4) Draw a parallelogram with two pairs of parallel sides.

\_\_\_\_\_

(5) Draw a trapezoid with exactly one pair of parallel sides.

\_\_\_\_\_

(6) Draw a quadrilateral with four right angles and opposite sides equal.

\_\_\_\_\_

(7) Draw a square where all four sides are equal in length.

---

(8) Draw a rhombus with all four sides equal.

---

(9) Draw a quadrilateral with two pairs of parallel sides and no right angles.

---

(10) Draw a rectangle with four right angles.

---

(11) Draw a quadrilateral with exactly one pair of parallel sides.

---

(12) Draw a quadrilateral with four equal sides and four right angles.

---
