

Measurement Story: Sports Day

Grade 3

Name: _____

Solve problems using the Sports Day story.

Use the story details. Convert units where needed (m to km, cm to m, mL to L).

Example: $400 \text{ m} \times 5 = \underline{2} \text{ km}$

- (1) The Grade 3 students need to run 800 meters for their race. The track is 400 meters around. How many laps do they run? 🏃
- _____
- (2) Grade 5 students run 2 kilometers for their long-distance event. How many meters do they run? 🚩
- _____
- (3) For the high jump, the bar starts at 90 centimeters. How many millimeters is that measurement? 🏊
- _____
- (4) The school record for the broad jump is 4 meters. How many centimeters is this record? 🏆
- _____

(5) Grade 4 students run 1,000 meters in their relay race. How many kilometers is that distance? 🏃
