

Missing Factors: Tables 2-12

Grade 3

Name: _____

Find the missing number.

Example: $12 \times \underline{\quad} = 72 \rightarrow$ Think: 12 times what equals 72? Answer: 6

(1) $\underline{\quad} \times 2 = 4$

(2) $\underline{\quad} \times 2 = 6$

(3) $\underline{\quad} \times 3 = 21$

(4) $\underline{\quad} \times 9 = 45$

(5) $\underline{\quad} \times 1 = 5$

(6) $\underline{\quad} \times 5 = 15$

(7) $\underline{\quad} \times 10 = 20$

(8) $\underline{\quad} \times 10 = 30$

(9) $\underline{\quad} \times 2 = 20$

(10) $\underline{\quad} \times 3 = 6$

(11) $\underline{\quad} \times 3 = 36$

(12) $\underline{\quad} \times 6 = 18$

(13) $\underline{\quad} \times 4 = 12$

(14) $\underline{\quad} \times 10 = 60$

(15) $\underline{\quad} \times 9 = 36$

(16) $\underline{\quad} \times 2 = 16$

(17) $\underline{\quad} \times 6 = 60$

(18) $\underline{\quad} \times 10 = 40$

(19) $\underline{\quad} \times 4 = 20$

(20) $\underline{\quad} \times 4 = 48$
