

## Missing Factors: Tables of 2, 5, and 10

Grade 3

Name: \_\_\_\_\_

Find the missing number.

Example:  $10 \times \underline{\quad} = 20$  Answer: 2

(1)  $\underline{\quad} \times 1 = 5$

(2)  $\underline{\quad} \times 5 = 10$

(3)  $\underline{\quad} \times 4 = 8$

(4)  $\underline{\quad} \times 9 = 90$

(5)  $\underline{\quad} \times 3 = 15$

(6)  $\underline{\quad} \times 9 = 45$

(7)  $\underline{\quad} \times 2 = 20$

(8)  $\underline{\quad} \times 2 = 10$

(9)  $\underline{\quad} \times 6 = 12$

(10)  $\underline{\quad} \times 6 = 60$

(11)  $\underline{\quad} \times 7 = 14$

(12)  $\underline{\quad} \times 7 = 70$

(13)  $\underline{\quad} \times 9 = 18$

(14)  $\underline{\quad} \times 6 = 30$

(15)  $\underline{\quad} \times 2 = 4$

(16)  $\underline{\quad} \times 10 = 50$

(17)  $\underline{\quad} \times 8 = 40$

(18)  $\underline{\quad} \times 10 = 100$

(19)  $\underline{\quad} \times 10 = 20$

(20)  $\underline{\quad} \times 1 = 2$
