

Division Word Problems: Mixed Four Operations Word Problems (No Remainders)

Grade 3

Name: _____

Solve each word problem. Show your work.

Read carefully. Decide which operation(s) to use, then solve step by step.

Example: Example: There are 3 boxes with 5 pens in each and 4 extra pens. $3 \times 5 = 15$, then $15 + 4 = 19$ pens.

- (1) A fruit stand has 7 baskets, with 15 apples in each basket. If 20 apples are sold, how many apples are left? _____ 

- (2) A teacher buys 34 blue pens and 26 red pens. She wants to pack them equally into boxes, with 10 pens in each box. How many boxes will she need?

_____ 

- (3) A toy store had 80 toy cars. They sold 15 cars. The remaining cars were then put into 5 equal display groups. How many cars are in each group?

_____ 

- (4) A baker bakes 4 trays of cookies, with 12 cookies on each tray. She also bakes 18 extra cookies. How many cookies did she bake in total? _____ 

(5) A library has 120 books. They are arranged with 10 books on each shelf. If 5 shelves are removed, how many shelves are left? _____ 

(6) There are 25 sparrows and 18 robins in a park. If 10 birds fly away, how many birds are still in the park? _____ 

(7) A class had 75 pencils. 15 pencils were lost. The remaining pencils were shared equally among 6 students. How many pencils did each student get?

_____ 

(8) A florist made 6 bouquets, with 9 flowers in each bouquet. She then shared all the flowers equally among 3 friends. How many flowers did each friend get?

_____
