

Multiply by 1,000: Missing Factor

Grade 3

Name: _____

Find the missing factor.

Example: $\underline{\quad} \times 1,000 = 8,000$. Remove three zeros from 8,000 → Answer: 8

(1) $2 \times \underline{\quad} = 16,000$

(2) $\underline{\quad} \times 3,000 = 12,000$

(3) $\underline{\quad} \times 7,000 = 63,000$

(4) $\underline{\quad} \times 9,000 = 18,000$

(5) $6 \times \underline{\quad} = 18,000$

(6) $3 \times \underline{\quad} = 27,000$

(7) $\underline{\quad} \times 4,000 = 20,000$

(8) $8 \times \underline{\quad} = 48,000$

(9) $\underline{\quad} \times 7,000 = 14,000$

(10) $\underline{\quad} \times 4,000 = 32,000$

(11) $2 \times \underline{\quad} = 4,000$

(12) $7 \times \underline{\quad} = 21,000$

(13) $\underline{\quad} \times 2,000 = 6,000$

(14) $5 \times \underline{\quad} = 25,000$

(15) $\underline{\quad} \times 9,000 = 63,000$

(16) $6 \times \underline{\quad} = 48,000$

(17) $9 \times \underline{\quad} = 45,000$

(18) $4 \times \underline{\quad} = 28,000$

(19) $5 \times \underline{\quad} = 35,000$

(20) $\underline{\quad} \times 9,000 = 36,000$
