

## Time Interval Subtraction (Elapsed Time) - Set A

Grade 3

Name: \_\_\_\_\_

Subtract time intervals, regrouping hours to minutes.

**Example:** 3 h 15 min – 50 min = 2 h 25 min

- (1) A task takes 4 h 30 min. If you have already worked for 1 h 00 min, how much time is remaining? \_\_\_\_\_
- (2) A bus ride is 5 h 30 min long. If you have already traveled for 15 min, how much more time is left on the ride? \_\_\_\_\_
- (3) A cake needs to bake for 7 h 00 min. If it has been baking for 30 min, how much longer does it need to bake? \_\_\_\_\_
- (4) A train journey is 3 h 30 min. If 45 min have passed, how much time is remaining? \_\_\_\_\_
- (5) A project takes 9 h 30 min to complete. If you have worked for 2 h 15 min, how much time is left? \_\_\_\_\_
- (6) A long meeting was scheduled for 6 h 00 min. If 1 h 30 min of the meeting has passed, how much time is remaining? \_\_\_\_\_
- (7) A flight is 10 h 00 min long. After 2 h 45 min, how much flight time is still left?  
\_\_\_\_\_

(8) A construction job is estimated to take 8 h 30 min. If the crew has worked for 1 h 45 min, how much more time is needed? \_\_\_\_\_
