

## Addition with Money: Making Change

Grade 4

Name: \_\_\_\_\_

Add prices for total. Calculate change. Use dollar sign.

**Example:** Items: \$1.75, \$2.00. Paid: \$5.00. Total spent: \$3.75. Change: \$1.25.

(1) At the grocery store 🛒, you buy apples for \$3.75 and milk for \$4.20. You pay with a \$20.00 bill. How much change should you receive?

---

(2) You visit a bakery 🍰 and purchase a cake for \$12.50, cookies for \$5.75, and bread for \$3.25. You give the cashier \$30.00. What is your change?

---

(3) At the book store 📖, you pick out a novel for \$8.99 and a bookmark for \$1.50. If you pay with a \$15.00 bill, how much money do you get back?

---

(4) You are at the pet store 🐾 and buy dog food for \$25.99, a new toy for \$7.50, and treats for \$4.25. You pay with a \$50.00 bill. How much change do you receive?

---

(5) At the office supply store 🖋️ , you purchase pens for \$3.49 and a notebook for \$2.75. You hand the cashier a \$10.00 bill. What is your change?

---

(6) You buy a puzzle 🧩 for \$9.99, a small car for \$6.50, and crayons for \$3.00 at the toy store. If you pay with a \$25.00 bill, how much change will you get?

---

(7) At the hardware store 🛠️ , you buy a box of nails for \$4.80 and a roll of tape for \$3.15. You pay with a \$15.00 bill. How much change should you receive?

---

(8) At the farmer's market 🌻 , you buy corn for \$2.50, tomatoes for \$4.75, and berries for \$3.99. You pay with a \$20.00 bill. What is your change?

---
