

## Measurement Story: Sports Day

Grade 4

Name: \_\_\_\_\_

Solve problems using the Sports Day story.

Use the story details. Convert units where needed (m to km, cm to m, mL to L).

**Example:**  $400 \text{ m} \times 5 = \underline{2} \text{ km}$

(1) Grade 3 students need to run 800 meters for their race. The running track is 400 meters around. How many laps must the Grade 3 students complete? 🏃

---

(2) Grade 5 students are running a 2-kilometer race. How many meters is this distance? 🏃

---

(3) The high jump bar for the younger students starts at 90 centimeters. What is this height in millimeters? 📏

---

(4) The school record for the broad jump is 4 meters and 20 centimeters. What is the total record distance in centimeters? 🏃

---

(5) Grade 4 students run a race that is 1,600 meters long. How many kilometers is this race? 🚩

---
