

## Missing Factor: Multiply Whole Tens

Grade 4

Name: \_\_\_\_\_

Find the missing factor.

**Example:**  $80 \times \underline{\quad} = 6,400$ . Think:  $8 \times ? = 64 \rightarrow 8 \times 8 = 64$ , add zero  $\rightarrow 80$

(1)  $8 \times \underline{\quad} = 640$

(2)  $\underline{\quad} \times 70 = 560$

(3)  $\underline{\quad} \times 40 = 160$

(4)  $9 \times \underline{\quad} = 720$

(5)  $2 \times \underline{\quad} = 100$

(6)  $8 \times \underline{\quad} = 240$

(7)  $3 \times \underline{\quad} = 60$

(8)  $\underline{\quad} \times 80 = 240$

(9)  $3 \times \underline{\quad} = 120$

(10)  $\underline{\quad} \times 20 = 100$

(11)  $2 \times \underline{\quad} = 80$

(12)  $4 \times \underline{\quad} = 80$

(13)  $7 \times \underline{\quad} = 140$

(14)  $\underline{\quad} \times 20 = 180$

(15)  $\underline{\quad} \times 40 = 200$

(16)  $\underline{\quad} \times 50 = 400$

(17)  $6 \times \underline{\quad} = 360$

(18)  $\underline{\quad} \times 20 = 160$

(19)  $9 \times \underline{\quad} = 540$

(20)  $\underline{\quad} \times 70 = 280$
