

Missing Factors: Tables 2-12

Grade 4

Name: _____

Find the missing number.

Example: $12 \times \underline{\quad} = 72 \rightarrow$ Think: 12 times what equals 72? Answer: 6

(1) $\underline{\quad} \times 1 = 2$

(2) $\underline{\quad} \times 3 = 6$

(3) $\underline{\quad} \times 9 = 90$

(4) $\underline{\quad} \times 11 = 110$

(5) $\underline{\quad} \times 2 = 4$

(6) $\underline{\quad} \times 5 = 15$

(7) $\underline{\quad} \times 9 = 27$

(8) $\underline{\quad} \times 5 = 45$

(9) $\underline{\quad} \times 3 = 9$

(10) $\underline{\quad} \times 1 = 8$

(11) $\underline{\quad} \times 3 = 18$

(12) $\underline{\quad} \times 5 = 25$

(13) $\underline{\quad} \times 9 = 18$

(14) $\underline{\quad} \times 11 = 77$

(15) $\underline{\quad} \times 2 = 24$

(16) $\underline{\quad} \times 7 = 56$

(17) $\underline{\quad} \times 1 = 10$

(18) $\underline{\quad} \times 7 = 35$

(19) $\underline{\quad} \times 10 = 30$

(20) $\underline{\quad} \times 2 = 8$
