

## Multiply by 1,000: Missing Factor

Grade 4

Name: \_\_\_\_\_

Find the missing factor.

Example:  $\underline{\quad} \times 1,000 = 8,000$ . Remove three zeros from 8,000  $\rightarrow$  Answer: 8

(1)  $2 \times \underline{\quad} = 4,000$

(2)  $9 \times \underline{\quad} = 36,000$

(3)  $2 \times \underline{\quad} = 12,000$

(4)  $\underline{\quad} \times 3,000 = 12,000$

(5)  $\underline{\quad} \times 2,000 = 10,000$

(6)  $3 \times \underline{\quad} = 18,000$

(7)  $\underline{\quad} \times 6,000 = 24,000$

(8)  $3 \times \underline{\quad} = 6,000$

(9)  $\underline{\quad} \times 7,000 = 63,000$

(10)  $4 \times \underline{\quad} = 28,000$

(11)  $\underline{\quad} \times 8,000 = 40,000$

(12)  $5 \times \underline{\quad} = 30,000$

(13)  $4 \times \underline{\quad} = 16,000$

(14)  $4 \times \underline{\quad} = 32,000$

(15)  $7 \times \underline{\quad} = 28,000$

(16)  $\underline{\quad} \times 4,000 = 32,000$

(17)  $7 \times \underline{\quad} = 14,000$

(18)  $6 \times \underline{\quad} = 42,000$

(19)  $\underline{\quad} \times 4,000 = 24,000$

(20)  $\underline{\quad} \times 2,000 = 12,000$
