

## Population and Area Subtraction

Grade 4

Name: \_\_\_\_\_

Solve geography problems using subtraction. Use commas.

**Example:** Canada's population is 38,005,238. Australia's population is 25,690,000. What is the difference in population? Answer: 12,315,238

(1) Tokyo has a population of 13,960,000 people. London has a population of 8,982,000 people. How many more people live in Tokyo? 🌐

---

(2) Canada covers an area of 9,984,670 square kilometers. Australia covers 7,692,024 square kilometers. How much larger is Canada? 📖

---

(3) California's population is 39,237,000. New York State's population is 19,836,000. What is the difference in their populations? us

---

(4) Lake Superior has an area of 82,100 square kilometers. Lake Huron has an area of 59,600 square kilometers. How much larger is Lake Superior? 🏞️

---

(5) Africa has an area of 30,370,000 square kilometers. Europe has an area of 10,180,000 square kilometers. How much larger is Africa? 🌍

---

(6) Wrangell-St. Elias National Park covers 53,321 square kilometers. Death Valley National Park covers 13,650 square kilometers. What is the difference in their areas? 🌲

---

(7) A town had a population of 78,500 in 2000. By 2020, its population decreased to 62,150. How much did the population decrease? 🏠

---

(8) The Mariana Trench is 11,000 meters deep. The Puerto Rico Trench is 8,376 meters deep. How much deeper is the Mariana Trench? 🌐

---
