

## Mental Division: Remainders (Divisor a Whole Hundred)

Grade 4

Name: \_\_\_\_\_

Write quotient and remainder as  $r\#$ .

Solve mentally. Write the quotient. If the division is not exact, write the remainder as  $r\#$ . Example:  $69 \div 4 = 17 r1$ .

**Example:**  $910 \div 100 = 9 r10$  |  $750 \div 200 = 3 r150$  |  $940 \div 300 = 3 r40$
