

## Mental Division: Missing Dividend or Divisor

Grade 5

Name: \_\_\_\_\_

Solve for the unknown number.

Use inverse facts to find the missing number. Example:  $\_\_ \div 7 = 8 \rightarrow 56 \div 7 = 8$ ;  $56 \div \_\_ = 8 \rightarrow 56 \div 7 = 8$ .

**Example:**  $\_\_ \div 7 = 8 \rightarrow 56$  |  $56 \div \_\_ = 8 \rightarrow 7$  |  $\_\_ \div 9 = 11 \rightarrow 99$

(1)  $\_\_ \div 0.5 = 24.8$

(2)  $7.2 \div \_\_ = 0.9$

(3)  $\_\_ \div 1.2 = 15$

(4)  $45.5 \div \_\_ = 3.5$

(5)  $\_\_ \div 0.25 = 32$

(6)  $12.8 \div \_\_ = 1.6$

(7)  $\_\_ \div 0.01 = 500$

(8)  $24.6 \div \_\_ = 0.3$

(9)  $\_\_ \div 1.5 = 10.2$

(10)  $8.4 \div \_\_ = 0.7$

(11)  $\_\_ \div 0.05 = 120$

(12)  $3.6 \div \_\_ = 0.12$

(13)  $\_\_ \div 2.5 = 4.8$

(14)  $10.8 \div \_\_ = 0.6$

(15)  $\_\_ \div 0.8 = 20.5$

(16)  $5.4 \div \_\_ = 0.09$

(17)  $\_\_ \div 0.1 = 75.3$

(18)  $1.25 \div \_\_ = 0.25$
