

## Population and Area Subtraction

Grade 5

Name: \_\_\_\_\_

Solve geography problems using subtraction. Use commas.

**Example:** Canada's population is 38,005,238. Australia's population is 25,690,000. What is the difference in population? Answer: 12,315,238

- (1) The estimated population of Brazil is 218,000,000 people. The estimated population of Mexico is 128,000,000 people. What is the difference in their populations? 🌍

- (2) The Great Barrier Reef covers approximately 344,400.8 square kilometers. The Mesoamerican Barrier Reef covers about 1,000.5 square kilometers. How much larger is the Great Barrier Reef? 🌐

- (3) In 1980, a country's population was 88,500,000 people. By 2020, it had increased to 102,800,000 people. What was the population increase? 📈

- (4) Russia's total area is 17,098,246 square kilometers. Canada's total area is 9,984,670 square kilometers. How much larger is Russia than Canada? 📖

(5) The population of Tokyo is approximately 38,000,000 people. The population of Osaka is approximately 2,800,000 people. What is the difference in their populations? 🏙️

---

(6) The Amazon Rainforest covers about 6,700,000.8 square kilometers. A portion of 800,000.5 square kilometers has been deforested. How much rainforest remains? 🌳

---

(7) A country's total land area is 8,515,767.0 square kilometers. Its total water area is 55,460.8 square kilometers. What is the difference between its land and water areas? 💧

---

(8) The population of California is around 39,200,000 people. The population of New York State is around 19,800,000 people. How many more people live in California? 🌻

---
