

## 4 Operations with Parentheses (Advanced)

Grade 6

Name: \_\_\_\_\_

Evaluate expressions following operation order.

**Example:** Example:  $(10 + 2) \div 4 + 5 = 12 \div 4 + 5 = 3 + 5 = 8$

(1)  $8 \times 11 + 4 \div 4 =$  \_\_\_\_\_

(2)  $12 \times 7 - 20 \div 4 =$  \_\_\_\_\_

(3)  $(34 + 69) \times 10 - 9 \div 3 =$  \_\_\_\_\_

(4)  $(65 + 48) \times 9 - 12 \div 3 =$  \_\_\_\_\_

(5)  $10 \times 5 + 20 \div 4 =$  \_\_\_\_\_

(6)  $6 \times 9 - 4 \div 4 =$  \_\_\_\_\_

(7)  $(44 + 31) \times 12 - 10 \div 2 =$   
\_\_\_\_\_

(8)  $(43 + 18) \times 11 - 3 \div 3 =$  \_\_\_\_\_

(9)  $12 \times 7 + 12 \div 4 =$  \_\_\_\_\_

(10)  $8 \times 11 - 6 \div 2 =$  \_\_\_\_\_
