

Circumference

Grade 6

Name: _____

Calculate circumference using $\pi \approx 3.14$.

Circumference = $\pi \times$ diameter. Use 3.14 for π .

Example: $C = 3.14 \times 4 = \underline{12.56 \text{ cm}}$

- (1) The diameter is 16 mm. Find the circumference. Use $\pi = 3.14$.

- (2) The radius is 12 mm. Find the circumference. Use $\pi = 3.14$.

- (3) The radius is 9 cm. Find the circumference. Use $\pi = 3.14$.

- (4) The diameter is 15 cm. Find the circumference. Use $\pi = 3.14$.

(5) The radius is 12 in. Find the circumference. Use $\pi = 3.14$.

(6) The radius is 16 mm. Find the circumference. Use $\pi = 3.14$.

(7) The diameter is 9 cm. Find the circumference. Use $\pi = 3.14$.

(8) The radius is 6 cm. Find the circumference. Use $\pi = 3.14$.
