

Science Lab — Word Bank

Grade 2

Name: _____

WORD BANK

BOIL BEAKER GAS TEST TUBE MEASURE SOLID MELT FREEZE LIQUID
STEAM

ACROSS

- 2. Like an ice cube or a rock, it keeps its shape.
- 5. When water gets super hot, it starts to bubble and do this!
- 6. To find out how big, long, or how much something is.
- 8. Hot water makes this cloudy stuff you can see rising.
- 9. When ice gets warm, it starts to do this and turns into water.

DOWN

- 1. You can't see it, but it fills a balloon. Air is a kind of this!
- 3. Water is this! It flows and takes the shape of its container.
- 4. Put water in the freezer, and it will do this to become ice.
- 5. A special glass cup with a spout, used for holding liquids.
- 7. In science, we do this to see what happens in an experiment.
- 10. A long, skinny container, often used in a science lab.
