

1 2
3 4

Sudoku 4x4

Grade 2

Name: _____

Fill in the empty cells so that every row, every column, and every bold box contains each number exactly once.

Start with rows, columns or boxes that already have the most numbers filled in. If a number already appears in a row, column, or box, it cannot appear again in that same row, column, or box.

Tip: If a row already has 1, 2 and 4 – the missing number must be 3.

PUZZLE 1

			2
	1	4	3
4	3		
		3	4

PUZZLE 2

3	1	2	
	2		3
			2
		4	1

PUZZLE 3

	3		4
		3	
3	1		
	4	1	3

PUZZLE 4

	4	2	
		1	4
	1	3	
	3		1
