

Number the story events in the order they would happen, from first to last.

Every story has a plot — the sequence of events. It starts with an introduction (who, what, where), then a problem, then events that lead to a solution.

Sequence Leo's Science Fair Story

- 1 _____
- 2 _____
- 3 _____
- 4 _____
- 5 _____
- 6 _____

WORD BANK

Leo felt a wave of despair, thinking all his hard work was ruined and he should just quit.

Leo spent weeks perfecting his solar-powered robot for the annual science fair.

Together, they worked late into the night, successfully repairing the robot and upgrading its solar panel.

The day before the fair, a sudden gust of wind knocked his robot, damaging its main circuit.

Leo received an honorable mention for his perseverance and learned to appreciate his sister's unexpected help.

His younger sister, Mia, unexpectedly suggested using a spare circuit he had forgotten about.
