

## Sort Planets: Closer or Farther than Earth

Grade 2

Name: \_\_\_\_\_

Sort each planet into the correct group: Inner Planets or Outer Planets.  
Inner planets (Mercury, Venus, Earth, Mars) are rocky and close to the Sun. Outer planets (Jupiter, Saturn, Uranus, Neptune) are larger gas or ice giants far from the Sun.

## Sort Planets by Distance from Sun (Relative to Earth)

### WORD BANK

Mars

Mercury

Uranus

Earth

Venus

Jupiter

Neptune

Saturn

**Planets Closer to the Sun than Earth** (These planets orbit inside Earth's path)

---

---

**Planets Farther from the Sun than Earth** (These planets orbit outside Earth's path)

---

---

---

---

---

---

**Earth** (Our home planet, the reference point)

---
